School Newsletter 14.10.21

School Reminders:-

School Council Meeting
Friday 5.11.21 at 3.15pm
~~~~~

Bush Kinder Open Day  
Thursday 9.12.21  
~~~~~

School Term Dates

T4 - 4.10.21 to 17.12.21

Friday lunch orders

Will be available from the Nangiloc Store. This week's special is:

- Plain hotdog \$6
- Loaded hotdog \$7

Please supply cash money on the day for these orders.

Summary from School Council Meeting - that was held on Friday 8th of October:

- The fence between the Kinder and our oval has started to be installed.
- Bush Kinder opening has now been postponed till the 9th of December.
- The Department of Education has renamed 'School Fees' to 'Parent Payment Contributions'. These voluntary financial contributions for 2022 have been set at \$170 per student.
- However, to help families who would like to contribute to the education of their children, we are offering these voluntary fees at 1/2 price during term 4, bringing the cost to \$85 per student.
- The Department has provided an indicative budget for 2022, this includes funds for:
 - - Additional shade sails to be installed.
 - - The tutoring program to continue.
 - - Possible funding for an Out of School Hours Care Program.
- The school camp has been cancelled.
- We are looking at running some fun events when Covid restrictions allow.
- Discussed an end of year event to farewell grade 6 students.

Some work from the Prep-2 Class

Some Students Work From Mr Crum's Class -

Billie Eilish
By Matilda Bird

"I've always done whatever I want and always been exactly who I am," a quote by Billie Eilish. Billie Eilish is a famous singer who is very popular. She was born in Los Angeles, California, United States, on 18th of December 2001.

Two of the most interesting character traits of Billie Eilish are creative and expressive talent. She is creative and follows her passions. She writes her own songs and sings them in her own way. Her expression is "duol" which means almost let down but not let down. This is shown on her face and in her hair. It's clear that her interests are creative and expressive.

Billie Eilish has had to struggle with anxiety since she was a child and when she was 17 years old she was also struggling with Tourette Syndrome.

Billie Eilish sometimes twitches and bumps around with Tourette Syndrome. She has this mostly under control. Getting control of these conditions has helped her to sing and speak clearly.

She makes me feel calm from her songs. She has a message in her songs to be yourself.

To be continued...

Nelson Mandela *By Lilly Saunders*

'It always seems impossible until it's done' quote by Nelson Mandela. Nelson Mandela was best known for his fighting against apartheid. Segregation with blacks and whites for equal rights for which he served 27 years in prison.

Nelson Mandela was born on 18th of July 1918 in South Africa and died 5th of December 2013. At the young age of 5 his father passed away.

Nelson Mandela's birth name was Rolihlahla.

In his early years he got the nickname Nelson from a teacher in school. Nelson got a law degree and became a leader.

He was imprisoned for 27 years and was released from jail in 1990.

He was awarded the Nobel Prize in 1993. He became the president in South Africa in 1994.

The 18th of July is Nelson Mandela Day and he asked for people to devote 67 minutes to helping others.

"Do not judge me by my successes, judge me by how many times I fell down and got back up again". He will be remembered for his struggle and leadership for freedom, equality, truth, love, peace and justice. He inspired many people through his life struggle.

Nelson Mandela was a good man because he fought for all cultures including his own. Nelson Mandela fought for equality so people could live in peace. I cherish the ideal of a democratic and free society in which all persons live together in harmony and with equal opportunities.

Galileo Galilei *By Ashlee Davis*

Did you know that Galileo was known for being an Italian astronomer, physicist and engineer, and might also be described as a polymath. He was famous for being the first person to discover moons orbiting planets other than Earth.

Galileo was born on the 15th of February in 1564 in Pisa, Italy. His main impact was the development of the telescope and being the first to use it in science and astronomy.

Character Traits

I believe that Galileo was a diligent and intelligent person. The reason why I believe that he was a diligent person is because he tried to prove that his theory was correct to the Catholic Church. In 1633 Galileo was sentenced to life imprisonment but later this was changed to house arrest due to his poor health. I also believe that he was an intelligent person because he verified the phases of Venus and discovered sunspots. Galileo had verified the phases of Venus in 1610 and wrote a book about sunspots in 1611. These two characteristics might have assisted him in his research because they could have helped him discover and improve his work.

Challenges

In this paragraph we will look at Galileo's loss of sight and trying to get the church to believe him. At the age of 72 about a quarter of the way through the year Galileo went completely blind. The best estimation for this cause was a cataract or glaucoma.

The reason the church didn't believe him was because the Holy Scriptures state that the Earth is at the center of the galaxy not the sun. The Catholic church stated that Galileo couldn't be a devoted Christian and scientist at the exact same time.

Galileo's Effect on Others

I believe that Galileo's two main effects on others is the development of the telescope and the starting studies on the speed of light. He had stated that he solved the problem with the construction of the telescope the first day he returned from Padua in Venice. Galileo then made a telescope the next day by using a convex objective lens in one extremity of a leaden tube and a concave eye piece lens in the other end, an arrangement that became known as the Galilean Telescope.

He calculated the speed of light for the first time. This was measured by the elapsed time witnessed by his assistant's light, coupled with the knowledge of the distance between them.
